PROFESSIONAL SUMMARY

Computer Science graduate with a foundation in software development, system analysis, and technical documentation. Committed to following quality, security, and development standards while contributing to scalable software solutions. Eager to learn from industry experts and grow within a professional engineering environment.

EDUCATION

BS Computer Science | **COMSATS University Islamabad** | *2021 – 2025*

- CGPA: 3.26
- Relevant Coursework: Data Structures & Algorithms, Database Systems, Computer Networks, Software Engineering, Operating Systems, Machine Learning, Object-Oriented Programming

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, Dart
Web Technologies: React.js, Next.js, Node.js, Express.js, Flutter
Databases: MongoDB, Firebase — schema design, CRUD operations, query optimization
Networking & APIs: REST API design, HTTP protocols, API integration and testing
Tools: Git/GitHub, Postman, VS Code — version control, debugging, API testing
Concepts: System Analysis, Software Testing, Technical Documentation, Responsive Design, State Management
UI Libraries: Tailwind CSS, Bootstrap, Material UI

PROJECT EXPERIENCE

Hotel & Restaurant Management System | **Academic / Personal Project** | *2024*

- Conducted system analysis to map business workflows into a modular, scalable software architecture
- Developed backend logic with Node.js and Express.js, implementing structured REST APIs with input validation and error handling
- Designed and managed MongoDB database schemas for bookings, customers, and analytics
- Built an admin dashboard to monitor system activity, demonstrating understanding of software testing and quality assurance
- Prepared technical documentation covering system architecture, API endpoints, and database design

Flood Prediction System | **Freelance Project** | *2024*

- Performed data preprocessing, feature engineering, and model evaluation using ensemble machine learning techniques in Python
- Designed a REST API to serve model predictions, applying software development standards for reliability and scalability
- Conducted system testing and hyperparameter tuning to improve prediction accuracy and validate model performance
- Documented the data pipeline, model architecture, and API endpoints for technical review

Sportify E-Commerce Platform | **Personal Project** | *2023*

- Implemented full CRUD operations for product management, order processing, and user accounts with a secure REST API backend
- Integrated third-party payment gateway, applying security best practices for handling sensitive transaction data

- Followed structured development standards including version control with Git and systematic debugging and testing

Modeling Agency Management App | **Freelance Project** | *2023*

- Built a cross-platform application with secure authentication (Firebase), real-time notifications, and role-based access control
- Integrated OpenAI API and OCR to automate data extraction and organize records — applied problem-solving to a real-world operational challenge
- Managed cloud-based image storage with Firebase, ensuring secure and structured file handling

CERTIFICATIONS

- Meta Front-End Developer Certificate — Google Web Development Bootcamp
- Kaggle Intro to Machine Learning Certificate

KEY STRENGTHS

- Analytical problem-solving: experienced in breaking down complex system requirements into structured technical solutions
- Technical documentation: consistently documented system designs, APIs, and data models across all projects
- Collaborative team player with strong communication skills and a willingness to follow guidance from senior engineers
- Quick learner — independently acquired skills in machine learning and mobile development outside of coursework
- Detail-oriented with a focus on code quality, security standards, and maintainable software design
